Four Easy-to-Spot Differences Between EXPAREL and DIPRIVAN® (propofol)

1. **Vial size and shape**
   - DIPRIVAN: Short and wide
   - EXPAREL: Tall and narrow; shortened neck space

2. **Cap size, color, mechanism**
   - DIPRIVAN: Wide cap; yellow and blue
     - Metal ring and stopper remain intact when cap is flipped off
   - EXPAREL: Smallest size (13 mm) white cap
     - Metal ring raises when cap is flipped off to allow removal of stopper

3. **Label colors, font, directives**
   - DIPRIVAN: Black letters on white background
     - Bold black lettering: For intravenous administration
     - Bold red lettering: Shake well before using
   - EXPAREL: Teal letters on white background
     - Teal bar with bold white lettering:
       - For infiltration and interscalene brachial plexus nerve block.
       - Not for any other route of administration
       - Grey banner surrounding NDC and 1.3% concentration

4. **Dosage**
   - DIPRIVAN: 1%; 200 mg/20 mL (10 mg/mL)
   - EXPAREL: 1.3%; 266 mg/20 mL (13.3 mg/mL)
